Population and Housing Narrative Profile: 2006

Data Set: 2006 American Community Survey

Survey: 2006 American Community Survey

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

For more information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

HOUSEHOLDS AND FAMILIES: In 2006 there were 1.6 million households in Louisiana. The average household size was 2.7 people.

Families made up 69 percent of the households in Louisiana. This figure includes both married-couple families (48 percent) and other families (21 percent). Nonfamily households made up 31 percent of all households in Louisiana. Most of the nonfamily households were people living alone, but some were composed of people living in households in which no one was related to the householder.

*Total population change includes residual - see State and County Terms & Definitions at <http://www.census.gov/popest/topics/terms/states.html>.

**Net international migration includes the international migration of both native and foreign-born populations. Specifically, it includes: (a) the net international migration of the foreign born, (b) the net migration between the United States and Puerto Rico, (c) the net migration of natives to and from the United States, and (d) the net overseas movement of the Armed Forces population.

Note: The April 1, 2000 estimates base reflects changes to the Census 2000 population resulting from legal boundary updates as of January 1 of the estimates year, other geographic program changes, and Count Question Resolution actions. All geographic boundaries for the 2007 population estimates series are defined as of January 1, 2007. Dash (-) represents zero or rounds to zero.
