Mile

- Original 1975 Neighborhood Boundary
- 2010 Census Tracts used to Approximate Neighborhood

Louisville's traditional urban neighborhoods were first defined by the Department of Public Works in 1975 and are still used today. However, federal agencies that publish data for small areas do not recognize these types of non-standardized geographies, and data is thus not directly available for Louisville's urban neighborhoods. The Census Bureau delineates census tracts — statistical units used to publish data for small areas — after each Decennial Census. Because census tract boundaries align fairly well with the urban neighborhood boundaries, this data profile uses 2010 census tract boundaries to approximate the traditional urban neighborhoods.

Unless otherwise noted, the data in this profile reflects the five year time period from the beginning of 2011 through the end of 2015.

Data Source: U.S. Census Bureau, 2011-2015 American Community Survey

An **unemployed** person is someone who does not have a job, but is actively looking for a job and is available for work. The unemployment rate is calculated as the number of unemployed persons in an age group divided by the sum of the number of employed and unemployed persons in that age group.

A person who is **not in the labor force** is someone who does not have a job, and is not looking for one. This includes students, retirees, those taking care of children or other family members, and others who are neither working nor seeking work. The rate of labor force participation is calculated as the number of persons not in the labor force in an age group divided by the population in that age group.

Note: The workplace is based on the address of administrative records, and may or may not be the actual location that a worker reports to most often. In the original data, all Jefferson County Public School (JCPS) employees were reported as working at the location of the JCPS administrative headquarters. Data provided by JCPS was used to allocate employees to the physical location they work at. JCPS is the only institution that was adjusted from the original data.

Percentages may not sum to 100 due to rounding.

- Field
- King
- Portland
- Shelby

Cluster 13

- Bloom
- Engelhard
- Hawthorne
- Maupin
- St. Matthews
- Wheatley

Indicates resides school for Germantown-Paristown students

Students attending Jefferson County Public Schools (JCPS) are assigned to schools based on their home address. The student assignment plan is designed to promote economic and racial integration across the district, so many students are assigned to a school outside of their neighborhood. Most students attend their assigned school, while others apply to magnet schools and programs outside of the assignment plan.

At the elementary school level, students are assigned to a cluster based on their home address, and given the option to choose from several schools within the assigned cluster. One of the options within each elementary cluster is a neighborhood school, called the “resides” school.

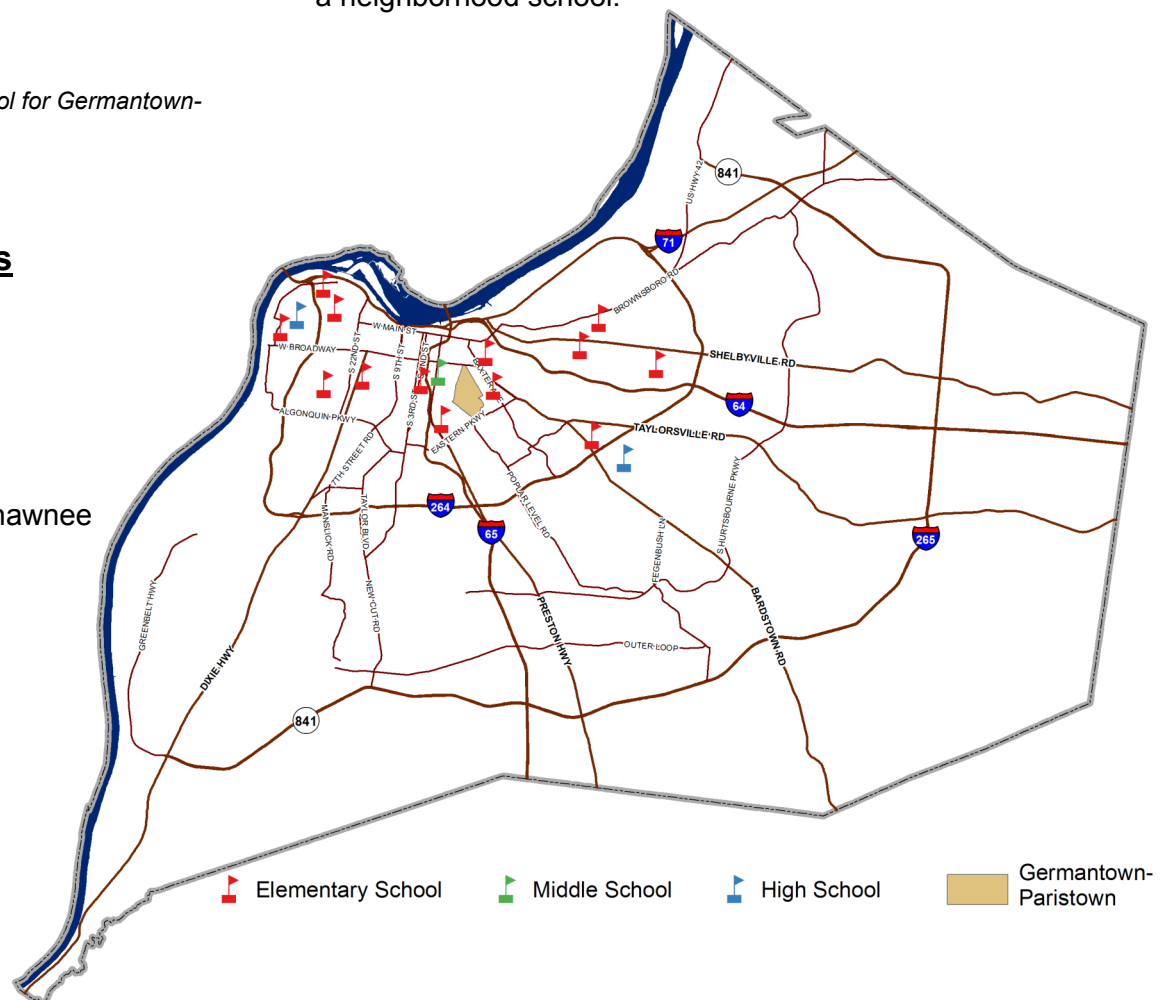

At the middle and high school level, students are assigned to a school based on their home address, which may or may not be a neighborhood school.

Middle Schools

- Meyzeek

High Schools

- Academy at Shawnee
- Seneca

EDUCATION CHARACTERISTICS

School Accountability Profile - School Year 2015-2016

The Accountability Profile summarizes the status of a school or district in the state accountability system, Unbridled Learning: College- and Career-Ready for All. The Overall Score is used to compare and rank school and district performance and to calculate improvement goals.

Germantown-Paristown "Resides" Schools	Overall Score	Classification	Rewards and Assistance Category
Bloom Elementary	79.6	Distinguished	
Shelby Traditional Academy	50.3	Needs Improvement	Focus School
Meyzeek Middle	69.0	Proficient	
Academy @ Shawnee	63.5	Needs Improvement	Priority School
Seneca High	66.0	Needs Improvement	Priority School

HOUSING CHARACTERISTICS

Housing Cost Burden

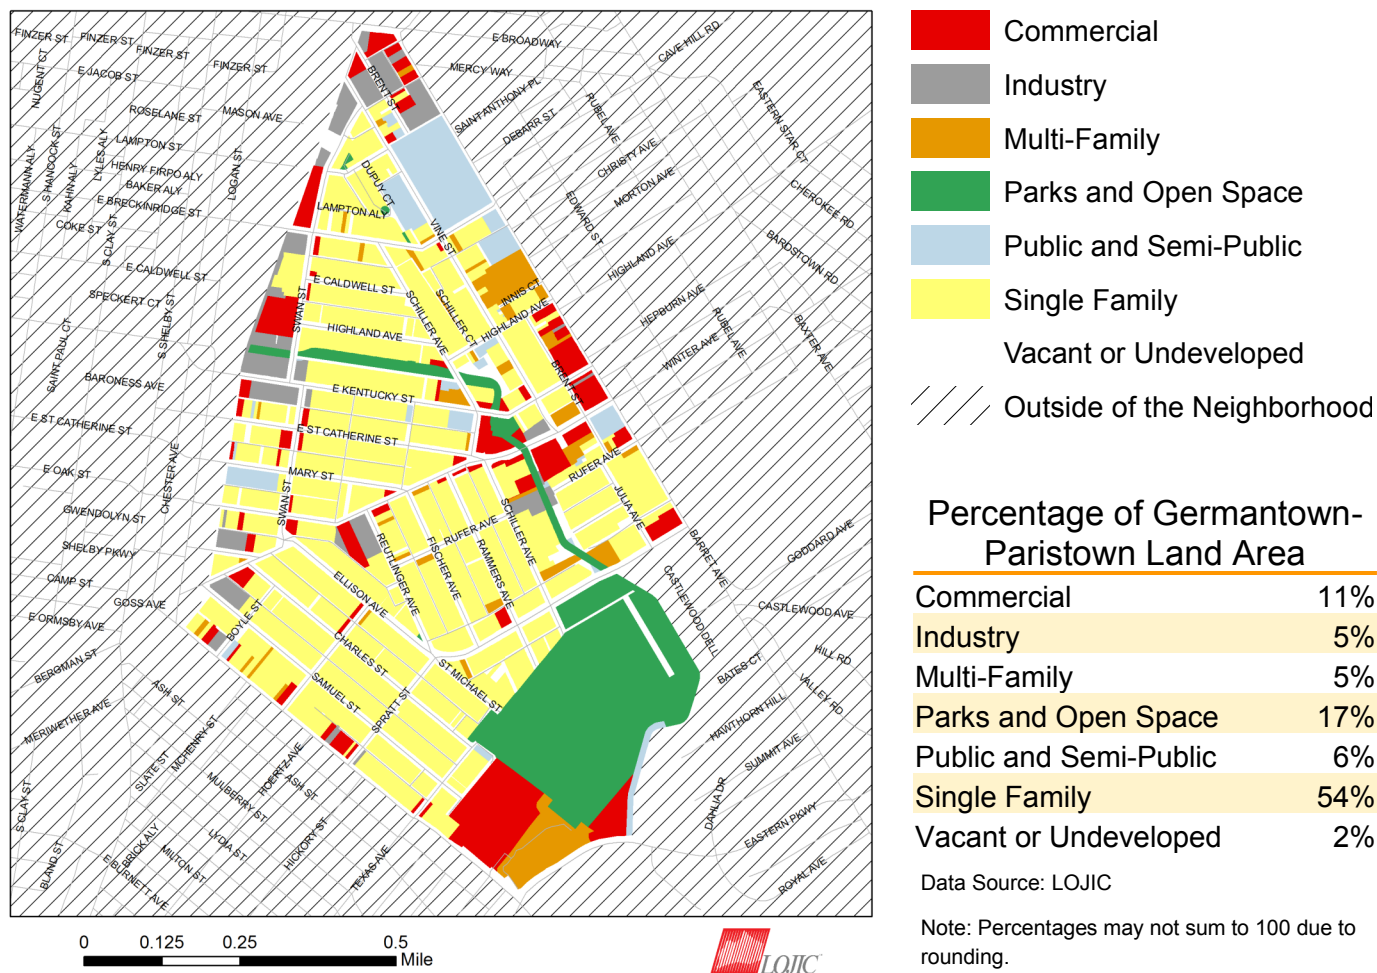

According to the U.S. Department of Housing and Urban Development, households that spend more than 30% of their income on housing are considered cost burdened and may have difficulty affording necessities such as food, transportation, and medical care.

	Germantown-Paristown		Jefferson County	
	Estimate	Percent	Estimate	Percent
Renters paying 30% or more of income on housing costs	306	44%	52,192	48%
Owners paying 30% or more of income on housing costs	234	21%	40,139	21%

Note: Housing costs as a percentage of income is only calculated for households that pay rent and report income.

Data Source: U.S. Census Bureau, 2011-2015 American Community Survey

Land Use (2016)

HEALTH CHARACTERISTICS

Health Insurance Coverage

	German-Paris Town		Jefferson County	
	Estimate	Percent	Estimate	Percent
Population under 6 years without health insurance	0	0%	1,820	3%

Data Source: U.S. Census Bureau, 2011-2015 American Community Survey

Food Access (2015)

	German-Paris Town		Jefferson County	
	Estimate	Percent	Estimate	Percent
Population who are low income and do not live close to a grocery store	0	0%	37,089	5%
Census tracts designated a food desert	0	-	13	-

Note: Population who are low income is defined as living at or below 200 percent of the federal poverty line. Not living close to a grocery store is defined as living further than one mile from a full service grocery store.

Food deserts are defined at the census tract level, when the tract is considered low income and low access. A tract is considered low income if the tract's poverty rate is 20% or greater, or if the tract has a median family income less than or equal to 80% of the metropolitan area's median family income. A census tract is considered to have low access if a significant number (at least 500 people) or share (at least 33%) of individuals in the tract is greater than one mile from the nearest grocery store.

HEALTH CHARACTERISTICS

Drug Overdose Mortality

The age-adjusted rate of drug overdose deaths in Jefferson County was 24 deaths per 100,000 standard population.

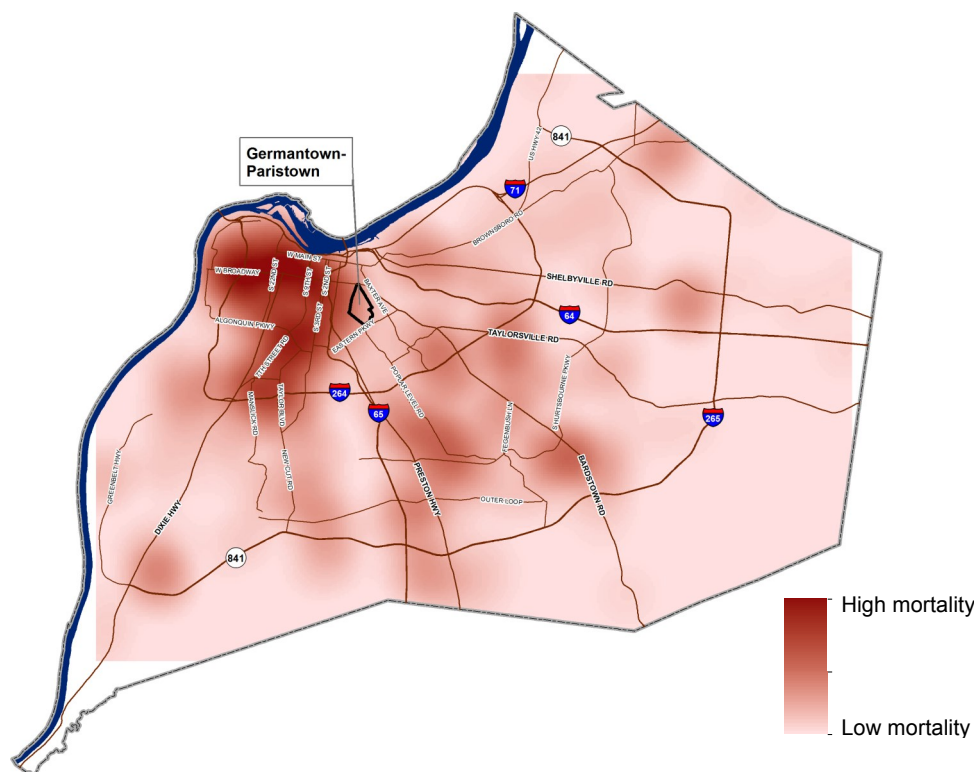

Due to the small number of observations, a drug overdose mortality rate was not calculated for individual neighborhoods.

Infant Mortality

For every 1,000 live births in Jefferson County there were 7 infant deaths.

Due to the small number of observations, an infant mortality rate was not calculated for individual neighborhoods.

Data Source: Kentucky Cabinet for Health and Family Services Department of Public Health
