- Original 1975 Neighborhood Boundary
- 2010 Census Tracts used to Approximate Neighborhood

Louisville's traditional urban neighborhoods were first defined by the Department of Public Works in 1975 and are still used today. However, federal agencies that publish data for small areas do not recognize these types of non-standardized geographies, and data is thus not directly available for Louisville's urban neighborhoods. The Census Bureau delineates census tracts — statistical units used to publish data for small areas — after each Decennial Census. Because census tract boundaries align fairly well with the urban neighborhood boundaries, this data profile uses 2010 census tract boundaries to approximate the traditional urban neighborhoods.

Unless otherwise noted, the data in this profile reflects the five year time period from the beginning of 2011 through the end of 2015.

An **unemployed** person is someone who does not have a job, but is actively looking for a job and is available for work. The unemployment rate is calculated as the number of unemployed persons in an age group divided by the sum of the number of employed and unemployed persons in that age group.

A person who is **not in the labor force** is someone who does not have a job, and is not looking for one. This includes students, retirees, those taking care of children or other family members, and others who are neither working nor seeking work. The rate of labor force participation is calculated as the number of persons not in the labor force in an age group divided by the population in that age group.

Note: The workplace is based on the address of administrative records, and may or may not be the actual location that a worker reports to most often. In the original data, all Jefferson County Public School (JCPS) employees were reported as working at the location of the JCPS administrative headquarters. Data provided by JCPS was used to allocate employees to the physical location they work at. JCPS is the only institution that was adjusted from the original data.

	Estimate	Percent	Estimate	Percent
Population who are low income and do not live close to a grocery store	0	0%	37,089	5%
Census tracts designated a food desert	0	-	13	-

Note: Population who are low income is defined as living at or below 200 percent of the federal poverty line. Not living close to a grocery store is defined as living further than one mile from a full service grocery store.

Food deserts are defined at the census tract level, when the tract is considered low income and low access. A tract is considered low income if the tract's poverty rate is 20% or greater, or if the tract has a median family income less than or equal to 80% of the metropolitan area's median family income. A census tract is considered to have low access if a significant number (at least 500 people) or share (at least 33%) of individuals in the tract is greater than one mile from the nearest grocery store.
